

TOLULOPE A. SHEKONI

Raritan, NJ • (601) 213-7781 • tolu.a.shekoni@gmail.com • linkedin.com/in/tolulope-shekoni-23542063

SUMMARY

Operations leader with 5+ years driving manufacturing excellence in FDA-regulated pharmaceutical environments. Experienced leading teams, implementing Lean/Six Sigma programs, and ensuring GMP and ISO compliance. Hands-on manager who has coached teams in CAPA resolution, standard work, visual management, and KPI-driven daily operations. Proven record reducing waste and improving cycle times across multiple shifts.

CORE SKILLS

- **SQCD Leadership:** Safety, Quality, Delivery, Cost board management & daily tier meetings
- **Lean & Six Sigma:** Kaizen events, waste elimination, value stream mapping, cycle optimization
- **Compliance:** cGMP, ISO 13485, QMSR/21 CFR Part 820, FDA-regulated manufacturing, SOP adherence
- **Quality Systems:** CAPA investigations, non-conformance reviews, change control, documentation & batch records
- **Team Leadership:** Hiring, training, coaching, performance management, shift staffing across multiple roles
- **Operations:** Production scheduling, maintenance coordination, shipping/receiving, product segregation, KPI tracking
- **Continuous Improvement:** Standard work development, visual controls, RCA, countermeasure implementation
- **Data & Analytics:** KPI development, process mapping, performance reporting, data-driven decision-making

EXPERIENCE

Staff Engineer, Business Excellence — Johnson & Johnson

Raritan, NJ | Mar 2024 – Present

- Lead site-wide Lean and continuous improvement initiatives for pharmaceutical manufacturing, driving cycle time reduction and operational reliability across QA/QC, MSAT, Facilities, Supply Chain, and EHS functions.
- Implement standard work, visual controls, and tiered daily management (SQDC boards) to increase transparency and accountability across shifts.
- Facilitate RCA and CAPA programs to reduce execution errors and strengthen right-first-time performance.
- Develop data-driven process maps, KPIs, and baseline measurements to identify variability and track SQDC performance.
- Partner cross-functionally to align improvement strategies with compliance, throughput, and safety goals in a GMP-regulated environment.
- Coach teams to build continuous improvement capability and data-centric decision-making across the organization.

Manager, Continuous Improvement — Catalent Pharma Solutions

Somerset, NJ | Mar 2019 – Jun 2023

- Led Lean and Six Sigma programs across manufacturing and supply chain operations, improving quality and reducing waste.
- Partnered with cross-functional teams to embed standard work and visual management systems on the shop floor.
- Strengthened site compliance by ensuring alignment with GMP, ISO, and FDA requirements for documentation, batch records, and SOPs.
- Developed future-state value stream maps and process documentation to support operational transformation.
- Delivered training and coaching programs to develop continuous improvement capability across operators and supervisors.
- Built automation tools using Power Platform, saving 50+ labor hours and reducing manual documentation effort.

Project Manager — Oxford Global Resources

New Brunswick, NJ | Oct 2023 – Feb 2024

- Led cross-functional project teams delivering process improvement initiatives across client organizations.
- Managed project scope, timelines, risks, and stakeholder communications to ensure on-time delivery.
- Designed and facilitated workshops to identify process pain points and co-develop action plans.
- Automated document sorting workflows, reducing manual effort and increasing documentation throughput.

- Produced training materials and guided change management activities to support adoption.

Technology Specialist — Professional Services Group of NJ

NJ | Jul 2023 – Mar 2024

- Supported clients with technical solutions and process automations to improve system performance and reduce downtime.
- Standardized data governance practices and modernized data infrastructure to increase reliability.
- Created technical documentation and delivered user training on new systems and automated workflows.

EDUCATION

Bachelor of Science in Engineering Science (Materials Science Engineering & Chemistry)

University of Virginia
